

PP Sediment Filter

Nominally Rated Depth Filters

Graded density, high porosity, Maxtron Filter is man holding capacity and long on stream life. The bonded fiber construction minimizes any possibility of fiber migration and is rugged enough to resist Particle shedding, even under pulse conditions. Consisting only of Pure polypropylene, Maxtron Filter is compatible with most chemical

Technical Specifications

Element Rating	: 0.5,1,3,5,10,20 microns
Max. Temperature	: 60 °C
Max. Differential Pressure	: 3 bar at 20 °C
MAX. Rec. Differential	: 2 bar
Dimensions	: O/D 2.5" x I/D 1" (Standard)
Lengths	: 10",20",30",40",Custom designed also.
